EZ250EQ

THE EQUIPMENT TRACKER

The **EZ250EQ** is our equipment tracker specifically designed and engineered for all powered assets. The device is built to withstand harsh environments and contains internal cellular and GPS satellite antennas. It requires a 12- or 24-volt power source, but it also contains an internal back up battery that will typically enable the device to function for 1 year without power.

Key Features

Engine Hours, PTO & 1-Year Battery Backup

- **10-Minute Reporting** – Reports every 10 minutes when equipment is on.
- **Engine Hours & Distance** – When ignition is turned off, it reports total engine hours used and distance traveled.
- **Low-Power Sleep Mode** – Low power use; wakes up to report once a day.
- **Tow Alerts** – Alerts if equipment is moved without ignition ON.
- **Power Disconnect Alert** – Alerts if the 12V or 24V power pack is removed.
- **Battery & Voltage Monitoring** – Low battery notification and voltage monitoring.
- **PTO Monitoring** – Ability to monitor PTO (Power Take Off) activity.

Specifications

ELECTRICAL / POWER	
Operating Voltage	12 / 24 V
Power Active / Tracking	<70 mA @ 12V
Power Sleep	<250 µA @ 12V (sleeping); <14 mA @ 12V (sleep on network)
ENVIRONMENTAL	
Operating Temp	-20°C to 80°C
IP Rating	IP67
CELLULAR AND GPS	
Constellation Tech	GPS
United States	AT&T, Verizon, T-Mobile
Canada	Bell Mobility, Rogers Wireless, SaskTel, Telus
Mexico	Telefónica Móviles México, Telcel

BATTERY PACK	
Battery Capacity	5,200 mAh rechargeable Li-Ion
Battery Technology	Lithium-Ion (rechargeable backup)
Battery Life	~365 days sleeping / ~70 hours active
Rechargeable	Yes
INPUTS & OUTPUTS	
Internal Sensors	Built-in motion sensor
Antennas	Internal Cellular / Internal GPS
Status LEDs	Amber (Cellular), Green (GPS Lock)
Audible	None
Serial Interfaces	None
Connectors	8 / 12-wire captive harness
REGULATORY	
Certifications	FCC, CE, IC, PTCRB, Verizon Wireless
